DATANOW

Vetted full-time experts for faster, higher-quality training data

DataNow brings together handpicked teams of experts with experience in both their fields and AI training and evaluation. Our contributors include former project leads and reviewers from large training projects.

DataNow grew out of that experience. We select, train and manage each team around your brief, delivering expert-written examples and responses, reviews, runnable tests, reference solutions and test runs.

What we build

Coding & terminal

Software engineering, debugging and tool-use tasks across databases, build tools, browsers and scientific software.

Finance & operations

Financial analysis, reconciliation and audit tasks built around documents, spreadsheets and business records.

Generalist training & evaluation

Conversations, writing, research and multi-step reasoning, with response comparisons and clear grading rubrics.

Specialist research

Engineering, mathematics and science questions with supported answers, including tests for models that search the web.

We also scope work in medicine, social sciences and other fields with our experts. Tell us what your project needs. Talk to us.

Why DataNow

Experts from day one.

Vetted subject experts with task-writing and review experience. We select and manage your team, saving you the search and basic training.

Less rework. Lower overhead.

Experienced task writers and reviewers know what good work requires. Fewer corrections mean less review time, lower costs and faster turnaround.

Thorough work you can inspect.

Work built around your brief, with expert review, reference answers and clear grading criteria. Executable tasks include runnable tests and model-run records.

Results

Project	Contributor result	Project context
Multi-hop reasoning	**402 tasks from 4 experts**	About 8% of a 5,000-task project
Terminal benchmarks	**≈150 accepted tasks per expert**	3.5 per project contributor
Verifiable task authoring	**6% of accepted output**	From 0.5% of the project population
Adversarial evaluation	**45% of accepted output**	From 17.5% of the project population

Contributions by our experts on individual projects. Explore our sample tasks.

Start with a sample

Put our experts to the test. We'll build three free tasks within a week of agreeing your brief and test them against a frontier model or yours. Judge the quality and turnaround, then decide on a pilot.
